

StudyBuy

A study-book checkout prototype

Daniel Sultan

github.com/itsdanielsultan/studybuy

Why study books

I'm studying for investment licensing exams.
Buying the wrong material wastes money and time.

StudyBuy checks an order against the learner's
budget, required edition and delivery deadline.

I also built InvestmentRegulation.ca to make the
exam material easier to understand.

Two offers, one deadline

Fictional example: CAD 40 budget, delivery by September 21

	Offer A	Offer B
Book	CAD 32.00	CAD 30.00
Shipping	CAD 3.00	CAD 5.00
Tax	CAD 4.55	CAD 4.55
Total	CAD 39.55	CAD 39.55
Arrival	September 20	September 22
Decision	Ask for approval	Stop: arrives late

Both offers use the same fictional 2026 paperback and quantity of one.

What works today

30 local tests pass

Each order needs explicit approval.

A changed quote needs approval again.

Repeat attempts stop within the same session.

Timeouts stay unresolved.

The offers and receipts are fictional.

Agnic test checkout and a public demo are still pending.
